Finance graduate from random Uni here. The only logical explanation for pic related is stated is negative interest rates. This means that if you hold any money in the bank, you will start paying the bank interest for money that YOU LENT HIM.

>Whet should I do?
take everything you can out of the bank as soon as possible. When negative rates are announced officially, you will have to pay a fee when withdrawing the cash(fee will be linked to the official negative rate).
Buy gold.
pray you don't get to the bank after all cash reserves have been withdrawn.
keep stacking food, alcohol,cigarettes, water and ammo if you can have a firearm.

Stay safe guys. this is it.

Here's what I'm not getting, every country's economy is built on the same fiat money. Why would the dollar suffer more? Sure, it's the world's reserve currency, but what is in a position to replace it? If it's gold or silver it fucks everyone's system, not just ours, and it's a good thing in the long run.

I think it might crash, but listen to this. I looked up the volatility index fund, which is the stock to show if the market will usually be bad or good. And it's up like 34 percent, so I think this is the Jews attempt at fucking with some last kinds to say everything's fine goyim don't fucking worry about it come back to the market. Which the problem with that is fucking 10 year treasury notes are down like near 30 percent or more now. So where the fuck are we going to get that, if we buy our notes back we'll hyper inflate and die, or we can deflate and die. This whole virus is a giant conspiracy, I think democrats cooperated with the Chinese to destroy the world economy so they can destroy us again.
